## **Webinar on World Environment Day- 2022**

The World Environment Day is celebrated on 5th June every year to encourage awareness and environmental protection. The United Nations General Assembly established World Environment Day in 1972, which was the first day of the Stockholm Conference on the human environment. World Environment Day (WED) is celebrated every year with a specific theme and slogan that focuses on the major environmental issues of the time. It's a day when people worldwide unite to celebrate the importance of environmental conservation and sustainability while highlighting the urgent need to address environmental challenges.

It is the principal vehicle of the United Nations (UN) for promoting worldwide awareness and action for the environment. This day serves as a global platform for public awareness and outreach, raising consciousness about pressing environmental issues and fostering collaboration among governments, businesses, non-governmental organizations, and individuals for a sustainable approach to development which safeguards the fragile environment of the earth threatened by global consumerist lifestyle.

The Eco Club of Surendranath Law College organized a webinar for the celebration of "5th June - The World Environment Day" on 9th June 2022 on the topic "Interface between Energy and Environmental Law: An Analysis" via the Zoom platform which was counselled by Prof. Dr. Mohammadi Tarannum, Vice-Principal of the College. World Environment Day urges all of us to protect our natural surroundings. It helps people understand the importance of nature and the need to protect it, fostering a sense of environmental consciousness. By bringing attention to environmental issues, it motivates individuals, communities, and governments to take positive actions towards environmental conservation and sustainability. It focuses on pressing environmental challenges such as pollution, climate change, deforestation, and wildlife conservation, promoting dialogue and action to address these issues on a global scale.

The webinar was held on 9th June 2022 via the Zoom platform. Almost 100 Teachers and students were present at this webinar. The program started at 12:00 PM with a welcome address by Dr. Caesar Roy, Assistant Professor of Law, Surendranath Law College. The esteemed expert for this webinar was Prof. Amita, Assistant Professor, Vivekananda Institute of Professional Studies, Delhi. She gave an insightful analysis on the topic "Interface between Energy and Environmental Law: An Analysis" where she explained the present constitutional, national & legal framework for environmental protection & relation of the energy sector of India to environmental protection. She also explained how India being a developing

country and on a verge of becoming an advanced industrialized nation, is witnessing an enormous challenge regarding environmental protection regarding the necessity to synchronize its environmental policies and regulations with that of its developmental aspirations for rapid industrialization. The main national challenge is to evolve a framework for sustainable economic development of the country.
